About Me

I am passionate about the app and 3D game development. My goal is to reach a good position in the IT field by doing satisfying work. I am strongly focused on completing tasks in fast-paced environments.

Work Experience

App and Game Developer - intership (3 Month)   *12/12/22 - Present*

Quality Webs - Digital Marketing, Website, SEO - Experts.

- I have had a range of key responsibilities in my previous roles, including working on the new live project 'Nebverse' as a senior team member.
- I have built many apps and solved numerous errors with my team. Additionally,
- I have worked on both multivendor and single-vendor Flutter apps and have experience with app designing and UI/UX. Furthermore,
- I have worked on VR game development with a team and also on website hosting and backend management.

Projects   2021 - 2022

MEMES Sharing App
The Memes Sharing App is an application that shows popular memes from Reddit, which users can share with anyone.

Bootstrap Website
The iCoder Bootstrap website was created using the Bootstrap framework and is hosted on GitHub. The URL for the website is harshjain.github.io/icoderbootstrap.
